Psychoacoustic,

Thanks for the photos. Your system looks formidable. Actually, I don't mind a raw finish or a utility finish. I could live with that for sure.

The detail of the spacer used on the grill mount assembly is great, and I can now see that shape is not very easy to make.

I admire your skills, and I would love to hear those cornerhorns.

Isn't it interesting how many avid hi-fi and horn-system fans there are in Japan?
