OK, hear is one that makes me flinch, literally. A hard beatle or other insect hitting my face shield when I'm doing about 160 or so on my bike.

It sounds like a gunshot, and will actually leave a deep scratch (along with but guts) on the plastic. Oh well, at least they are DEAD bug guts!

Floyd

The guy with the blue and silver Hayabusa that scared the crap out of you when he wove around your car like a missle. LOL
