Does anyone else like to watch concerts on DVD? I never watched them much growing up, but my wife was raised on them and has almost as many concerts as movies. Consequently, she also had the better home theater before we were married, although we've both made improvements to it since then.

Her favorite concert on DVD is probably Hell Freezes Over by The Eagles, but mine is 311 Day by (you guessed it) 311. It's seriously about 4 hours long!
