Hi, Yes .... storage and compatibility. Add in accessories. I use a Sony and it does what I need and will sync with itunes (although I don't use that feature). I like it because it is an in between size. Bigger than a nano and smaller than an iPod. Also battery life is about 30 hours on a charge. It holds enough music for any trip I've been on recently... about 500 hi-res MP3s (I rip them at 320K).
