Hey Wayne,

I've been having a serious internal debate about which to build, 4pi 3pi econowave standard/deluxe, etc. I think I've narrowed it down to doing a 4pi or 3pi build. Would it be possible to get the plans to both--figure I'll decide based on overall dimensions and costs when I add it up.

I'm basically looking for a solution for behind the screen LCR, so size (depth) is a bit important. What is also important is barrier factors (distance/placement from walls etc).

Steve
