Thank you Wayne for your willingness to answer any questions. Bill, thanks for the pictures. I have talked to a cabinet maker and am going to have the boxes made. The last thing I would want, would be to have to redo them due to my/my dad's inexperience with wood working. Funny because we have both fully restored muscle cars, and he used to be a crew chief for an injected alcohol dragster but these 4pi boxes are making us rethink the build. I guess without the right tools things become very difficult, very quickly.
