I'm going to run with Baltic Birch. I did read up on the wood. It seems it comes in 5' X 5' X 3/4" more than 4' X 8'.

I had to find a source of better grade B. Some places only had the "BBB" lower grade that has the football patchwork in the veneer. I have a place that has "B"/"BB" grade sheets of 5' X 5' X 3/4". "B" grade on one side meaning perfect veneer and then the other has the football patch work that has the football patch matching wood tone.

Thanks Wayne. I think I'm going to build this fall and doing some research at this time.

What do you charge for the 2226h and the B&C driver for the upgraded 4PI? PM or e-mail me this if you can please.

Thanks,

Andy
