Subject: Pi one port

Hi Wayne, I am assembling a pair of Pi one.

I have obtained a port duct from PE:

http://www.parts-express.com/pe/showdetl.cfm?Partnumber=260-478

Unfortunately it is flared and has the required diameter nearly in the middle, it is much larger at the end that will be on the face of the baffle.

I can cut the duct to the required length, no problem there.

What worries me is the diameter of the port: does it have to be of the designated size all the way, or just at one end is enough?

Thanks.

Massimo
