
Subject: Repair JBL 2226H cone?

Hi all. I just got some 2226H's in the mail and it appears one of them got damaged during shipping. Is there any way to repair this without buying a recone kit (\$70-\$100)? I'm not worried so much about the crack since I can fix that with some watered down glue, but I am worried about the chafing on the cone itself. The cone also sits a fair amount below neutral in its range, which worries me as well.
