Quiet_Storm wrote on Sun, 26 August 2012 23:28 Wayne, I'm considering upgrading to the H290Cs on my 4 pis. This thread has me hooked!

By the way, I've been loving my 4 pis and 3 pi subwoofers. I don't think anyone's left my apartment unimpressed. However, now I have a bit of upgrade-itis plus I'm considering a build for my dad, so I might try to knock both out in one purchase.

Also not to threadjack too badly, but I'd like to get your thoughts on the best speakers for my dad. He has an entertainment center in a corner that is closely flanked by his speakers. Based on this limited arrangement (and no room for flanking subs), I'm thinking 2 pi towers might be the way to go. What do you think?
