Wayne, looks like the H290C waveguides will be here Monday, though UPS says they are in NY right now!

Until I get my woofers for the eventual 3Pi, I intend to set up the H290Cs in my home rig.

The home rig uses the 4Pi crossover/DE250/JBL 123A-1.
I have added 20dB attenuation from your chart plus an LPad for more attenuation and adjust-ability. Currently running QSC waveguides.
