Hey there LetterBeacon (at first I read letter bacon ... mmm, bacon)

The sizes of Wayne's speakers are at his website under specs/pricing

http://www.PiSpeakers.com/Prices.html

The 2Pi s and some of Wayne's other speakers are tube friendly because they have a nice smooth impedance across the audio frequency range. Tube amps sometimes have trouble with speakers that have lots of dips and peaks in impedance.

If you're on a budget then you've come to the right place: the 2 Pi s are a great value.

Good luck with your amp!
Cheers,
Jeff
