Hi, I have the CX300II buds and really like them. Comfortable, good noise rejection and rather nice sound. I use them with a Sony NWZ-E344 MP3 player. A really good combo. I also have a set of HD280 Silver Sennheisers. Full over the ear phones. Comfortable and quite good. I prefer them when I can use them. The buds are for travel mostly. The big ones stay home. I have several other phones (Koss Pro4AAT is the next best) but feel the Sens have a more realistic sound than any of the others.
