Subject: Need help with VOTT crossover Posted by hurdy_gurdyman on Mon, 01 Oct 2012 17:57:05 GMT View Forum Message <> Reply to Message

I have a friend's Altec A7 VOTT sitting in my spare room needing a new crossover and CD diaphragm. The CD is a 802D and the bass driver is a 416A. The XO components have been dipped in black gunk so no values are readable. Anybody have or know where a crossover schematic is available? Also, I'll need a replacement diaphragm and don't know where to find them.

I'd sure like to get this monster out of my room...

The XO number is N-500-E. Can't find a schematic on my internet searches.

Dave
