It looks like this new Dayton driver is a copy of the older B&C 250 driver lineup

B&C used to carry two versions of the 250... One in a Titanium diaphragm and one in a polyimide diaphragm.

I wonder if the old B&C lineup is what was used by Dayton to build these two versions around...
The new Dayton driver here has two versions like the old B&C in a Titanium diaphragm and one in a polyimide diaphragm
