Subject: Audio in a Convertible Posted by audioaudio90 on Sat, 20 Oct 2012 13:38:35 GMT View Forum Message <> Reply to Message

I love riding with the top down in my car. It's a real shame I can't also enjoy music when I do that. I blast the stereo so I can hear it over the wind whipping around but of course it's still harder to hear, especially at certain frequencies where the wind masks them a bit.

Does anyone else know what I'm talking about?
