I wish mine were as well built as BigMouthinDc's I probably made all the usual rookie mistakes and than came up with some more. On the bright side, I will keep the speakers behind the screen so the looks are not all that important.

I did not have a chance to listen to them in any meaningful way. And, for reasons beyond my control, I won't be able to for at least another week. the suspense is killing me but there is nothing i can do...

BTW, I'd gladly help you with measurements if you'd like, as long as you keep in mind the limitations of my gear and expertise.
