Making some progress, slowly but surely. I'm doing four of these prototypes, and have a lot of other work so I can't do much each week. But I have the boards done, ready to go into the chassis. Next, I'm planning to make a bunch of coax cables to connect the RCA jacks to the boards. Then I'll connect them and the switches and LEDs and mount the boards. I hope to have at least one of them done before Christmas.
