DeccoRec wrote on Sat, 15 December 2012 13:43I just got a Galaxy S iii last night. What's the easiest way to get music files from my pc or laptop onto my Samsung Galaxy? Thanks guys!

That's the phone I'm saving up for. How do you like it so far? Would you buy it again?

As for the music transfer, I just use a mini SD card. My phone has a little slot for it on the side and then I have a USB adapter that will make the mini SD card fit into my computer.
