You are right, Bill. Norah Jones has an amazing voice. It's funny how those of a more seasoned age love her. 50 Cent and Audioslave seem to seem to attract a younger audience. Age = knowledge?I bought my mom Norah's CD last year. We all sat around in my parents living room and listened with amazement how mature and wonderful she sounded. She can act a little quirky, though. The TV station I work for is located next door to an outdoor amphitheater. I stepped outside and took an extended smoke break to hear a few songs. When she started getting NBC programming in her ear, she reacted kind of, let's say, unseasoned. Her reaction was pretty entertaining, I must say. She does have a great voice. Next time she's in town, I plan on sitting on the amphitheater lawn with a beer in my hand. Not at work.
