iLoveiPod wrote on Fri, 28 December 2012 14:07Timron - Yes, I was able to fix the problem. Like Wayne suggested, I needed a different cable than the one I had, which was USB only. To make video out work, your wife will need the iPod cable like Wayne linked to that has the red, white, and yellow A/V jacks on one end. Those three will plug into the TV and then when she sets the iPod to "video out", the videos will display on the TV.

Thanks. I'll go ahead and order that cable tonight. I think I've still got an active Amazon Prime membership, so hopefully I'll have it here by the end of the week.
