I hardly even listened to music these past months, but with a major project out of the way (a Melissa and Doug kit but it still took 5 months!)

I began a pair of 2Pi Towers this week

They're cut, as I've been threatening to do for over a year, for those SB-29 Tweeters.

I've been in touch with Steve Brown to let him and, now you know, that I intend to make LSAF this year and he'll be there too. I intend to drive down with some gear and set up a "come in and listen" room. Hopefully, Steve will manage to get some S.B. Brown components past the TSA shmucks.
