Subject: From video to Audio
Posted by Sonicsound on Wed, 09 Jan 2013 15:50:18 GMT

Is there a way, by any chance, to somehow strip the audio from a video and simply keep the audio portion? I downloaded some frequency videos recently off of Youtube, and I would like to put the frequency alone as an mp3 onto my cell phone. The only program I have to work with is Audacity, and maybe Cakewalk.
