Subject: Small Speakers - Big Sound?

I'm listening to my tunes through a hand me down stereo that my dad had for years. The speakers sit on floor stands and are half as tall as I am. As much as I hate it though, they're wearing out and soon I'll have to buy new ones. Are the little bitty speakers they're selling nowadays just as good in terms of sound quality? If not, which ones do sound good?
