audioaudio90 wrote on Thu, 28 February 2013 06:37I personally still prefer larger speakers that move some air for a good bass response. I do have a couple small Sonys for my rear surrounds, but that's only because we already had them and our budget is super tight right now.

So, do you not think that smaller speakers can provide the same bass response as larger speakers? What about a surround sound setup with a dedicated subwoofer?
