Chicken wrote on Wed, 27 February 2013 07:53If you are sure everything is placed the way you want it to remain, running cables through the walls is the way to go. It's a bit of a pain but it looks better. If you like to rearrange things, though, the cable hiders are a better bet.

We rearrange things too often to run cables through the walls, so we opt for the cable hiders. They are definitely not as attractive though.
