Just got her 5 CD compilation of unused tracks, hits from other albums and even some songs she wrote that were never released. The usual booklet with fluffed bio. The paxckaging is nice but the devil to get the interior CDs out.The music, tho' is great. I'm through 2 of the 5 so far and find myself enjoying this more than any single album. 50 bucks. You really have to be a fan or be 'gifted'.
