Hi, They are not used by most manufacturers now. HDMI is the champ and the mini HDMI catching up as well. I usually go to Amazon to get stuff like that as they will have a large selection and the prices are quite cheap compared to brick and mortar stores. I find it insane that a 6 foot no frills HDMI in the stores is \$50 or more when one of the same quality on Amazon is \$6 and often is delivered in 1-2 days for about \$3.
