Subject: Re: Can this enclosure/speaker be reverse engineered? Posted by sneasle on Sun, 31 Mar 2013 18:47:13 GMT View Forum Message <> Reply to Message

What kind of measurement gear are we talking about?

I have access to a rather large lathe, but it's something I would need to schedule time on in advance. From what I can see the done above the 6" driver appears to be layed up fiberglass with some kind of solid core (plaster maybe?), the top one appears to be cut from wood or plastic.
