Subject: Violin - Acoustic to electric? Posted by The Mother on Fri, 19 Apr 2013 01:44:52 GMT View Forum Message <> Reply to Message

My son the musician wants something for his birthday that I need help understanding. He's a violin player, in a strings group. He wants some kind of gadget to attach to his regular violin to amplify it like an electric instrument. Is there even such a thing? If so, where would I look for it?
