Wayne, if you and I ever met, we would probably talk for hours on end. Remember in the original series where Zefram Cochrane was discovered on a planet; held sort of captive by the "Companion" ? Said (female) companion also made him age-less. The female actress was none other than "Ellie" : Andy of Mayberry's very first girlfriend ! As far as the Starship goes, the Enterprise was NCC-1701.... no bloody A, B, C or D !! ( words of scotty ) I guess I owe it to myself to start watching the series. I'll get over the Bakkula thing. catch up with ya later,  
Scott L
