In the list of the types of show visitors I referenced above, I missed one. Category 8 is Mr Bad Music Guy. He brings his own burned CD and asks to hear it on your system. My best was a guy who had a track recorded more than 50 years ago in monaural, with 100 people playing John Philip Sousa marches on 100 banjos in a very reverberant room. The guy who takes Metallica Death Magnetic around is a close second. That one will clear a room in one nanosecond.
