Subject: 2pi tower crossover: mono or biwiring? Posted by Jump on Thu, 16 May 2013 17:49:15 GMT

Hi Wayne, Hi everybody,

I am close to finish the cabinets of my 2pi tower, the next few days I will start the crossovers.

So I would like to know if it would be possible to make the crossover biwiring instead monowiring ... and if so, how should I do it.

I think, in this way, I could drive tweeters and woofers with 2 different amps, in the future.

What do you think?

Regards Giampiero - Italy
