Hello Wayne, hello guys,

these days I have to put the insulation inside the speakers.

I have read that you advices white glue ... but what do you mean about white glue, the white vinyl glue for wood and paper?

Another question, could I remove the sponge on the outer edge of the Alpha 10?

I would replace it with an aluminium ring, or maybe put the aluminum ring above it, like Zu Audio style...

Regards

Giampiero - Italy
