:I am looking for a comparative review for 3Pi VS Klipsch Synergy F2 from u all. I am new to Hi efficiency..... heard Synergy F2 --& found it very much creamy smooth, unfatiguing....

As a matter of fact I am looking for a speaker with creamy smooth tone, a bit unfatiguing, a bit analog, perfect for below average recordings but musically good albums

Klipsch Synergy F2 throws a 3D soundstage with good depth perception too. I am a 3D soundstage fan....

Looking forward from u all.....

lol:
