Kingfish wrote on Mon, 03 June 2013 14:49As far as I can tell, Spotify is what people use to find music through a network of friends. Pandora is kind of like You Tube with Google + turned on in that it suggests music based on previous selections.

Thanks, Kingfish. Yes, Pandora analyzes selected songs and plays others with similar elements. I didn't know Spotify was based on social networking. I can see how that would be fun too.
