Hi Wayne, I got the cheaper version of it that comes with a built in signal generator. Less than half the price at about \$155US. The differences in the scope sections don't matter to audio work. I don't need 60MHZ response 12MHZ is just fine. But... it can do direct Bode plots. A really cool feature. So while the new one is just as vulnerable as the old one, it is at least cheaper to replace.
