Subject: Re: Open Baffle Speakers Posted by hurdy_gurdyman on Sat, 15 Jun 2013 14:19:32 GMT View Forum Message <> Reply to Message

Those baffles look a lot like my first baffles back around 2003. Mine sounded good enough to convince me this was the way to go. Now I have tall thin baffle with 10" mid-woofer, 6 x 12 horn from 1100 Hz up, and 15" bass driver. The possibilities are endless! The common factor is that natural midrange (voices are superb!), and ultra clean bass.

They look good. Keep experimenting. there is more...

Dave
