Hi, Anyone out there with an old Dual 701 turntable they want to unload. I would like one with a functional motor and control assembly but all else is not needed. The only cosmetic issue is a decent looking platter. Drop me a PM if you are interested. I want to try to build a custom TT and the 701 guts (less the arm and automated stuff) would work nicely.

EDIT: I might consider some sort of swap. I have lots of stuff here.
