Subject: Re: Midrange Horn Posted by Wayne Parham on Mon, 09 Sep 2013 23:00:40 GMT View Forum Message <> Reply to Message

Just the flare. The rest is kind of easy and probably wouldn't meric the cost. But the flare angles make it attractive for some to buy the flatpack kit. As horns go, it's as easy as it gets, but still, there are some angles to cut. I recommend starting off doing a mockup in cardboard for people that want to cut their own.
