We listened and we were impressed. Sonic Impact is reviewing two new products this month that will incorporate all of the comments we received from the field. WE are juicing up the TA2024 with a premium cabinet (wood product of course for low conduction) and tricking it out with heavy dials, 24kt binding posts, inputs for RCA or banana clips and easy access for independent power inputs. To make things worse, we will be testing a 50 watt per channel version! Bob Cotton
