Subject: FourPI-TwoPI plans

Hello Wayne, years ago bought the material to achieve the SevenPi.

Time has passed and things have changed, I no longer have the space for that project. I thought I'd go to the project FourPi, in this case would advance The Eminence Alpha 10 A. I would use this speaker for projects TwoPi or TwoPi tower.

I ask you kindly if you can send me the plans for Four PI and TwoPI, bass reflex / tower.

Thanks in advance.

Paolo from Lake Como
