Hi Wayne,

I just joined the board today after surfing the interweb after just discovering some talk about your 4Pi.

Any chance you could also send me plans for your 4Pi?

I think this looks like something I might take on for my next project.

A year and a half or so ago I built a beefed up pair of Cornscallas (based on Bob Crite's Style C) that are now my daily drivers.

<http://www.critesspeakers.com/cornscala-style-c.html>

Right now I am about half way done a Frugal Horn build.

I am anxious to see how the FHs compare to my CS horns.

Conversely, a 4Pi... CS comparo would be VERY interesting.

Have you ever been able to compare your 4Pi with a quality Cornscalla build?

Thanks in advance,
Tom
