A BIG thanks to Wayne for passing on the 4Pi plans.

I have read a few of the build threads and there seems to be a ton of helpful info here on the board.

I won't be able to get right on my 4Pi build as I am still trying to finish up my last project, a pair of Frugal Horns.

It probably will not get started until after the new year, but that will give me some time to save up and source the parts.

Although I have already gotten the more costly part done, I picked up a used pair of 2226Hs yesterday via FleaBay.

The JBLs were a bit of an impulse buy after reading the plans Wayne sent me.
