Subject: Placement of 2pi surrounds

Hi Wayne,

Can you (or anyone else) provide direction concerning placement of studio 2pis as surrounds? I'm planning to implement a pair as I expand into 5.1. I'm curious about aiming, height, and distance behind the listening position. I'm sure there is a certain amount of experimentation due but I wanted to see what is recommended or has worked for others in the past. My room is 13x17 with 7pi mains.

Thanks Jeremy
