gofar99 wrote on Thu, 24 October 2013 18:16It would take two steps but you could feed them into a PC and then make CDs from the PC files.  There is lots of free software that will do the job.  It does assume you have a good sound card or other interface device that will not degrade the bit and sample rate of the originals.

My sound card isn't that great, and in any case, I don't have the hardware to play the DAT.  I haven't even seen a DAT machine in years.
