Speaking of Ohms, I'm finally, with a lot of help from Professor Brown, building the 50 Watt Monoblocks. The 5K Hammond 1650R OPTs have 4, 8 and 16 Ohm taps. My 4 Pi 2226Js, are 16 Ohm and the DE-250s, as the OP discovered, are 8.

I'm going to have 8 and 16 Ohm outputs, which is best for the 4 Pis? I'd hate to lose 33% of the Wattage with too low an impedance.
