Subject: Re: 4012HO vs TD12S Posted by rkeman on Fri, 17 Jan 2014 23:44:26 GMT View Forum Message <> Reply to Message

The amplitude curves are very smooth with the 3 Pi at 1 meter. The new H290C tweeter and modified crossover seem to make almost no difference to the frequency response either. It is a shame if this is all just a bad run of cones, the TD12S is a significant improvement over the Eminence 12LFA.
