Hello -

I have a Jbl 2213h woofer. Would this be a suitable woofer for a 3 Pi build? Any crossover or tweeter changes or suggestions?

If it's a good fit, I'd love to have a copy of the plans.

I'm restoring a 1952 Scott 1510 radio and amplifier and it sounds just lovely through one of my brother-in-law's JBL 4311 speakers.

Thanks!

Mike
