Subject: 2Pi Help... Posted by etet on Sun, 18 May 2014 21:37:19 GMT View Forum Message <> Reply to Message

I have had my orignal 2Pi speakers for a few years now and every time I try something new I always end up going back to them. Now I need to build a set of 2Pi towers for a gift but there is an issue. Due to space and aesthetics they can be only 41" (external) tall. They can be wider/deeper. I know this is not recommended due to standing waves etc, but as we know life is not perfect. Any Help?
